Getting started with the IBM Cloud CLI
In this tutorial, you install the IBM Cloud® Command Line Interface, along with the option to install popular plug-ins and tools so that you can work with apps, toolchains, pipelines, Kubernetes clusters, and more in IBM Cloud.
The installation command in this tutorial installs the latest stand-alone IBM Cloud CLI version available, with the option of installing the following tools manually:
Git
Docker
Helm
kubectl
curl (Linux™ only)
IBM Cloud Functions plug-in
IBM Cloud Object Storage plug-in
IBM Cloud Container Registry plug-in
IBM Cloud Kubernetes Service plug-in
Tip: Want to start working with the IBM Cloud CLI? Try out IBM Cloud Shell, which gives you a personal cloud-based shell workspace with the full IBM Cloud CLI and tons of command-line tools - no installation needed. To get started, click the Cloud Shell icon in the IBM Cloud console menu bar. For more information, see Getting started with IBM Cloud Shell.

Step 1: Run the installation command
The latest version of the IBM Cloud CLI is installed when you run the command. As the CLI installs, keep an eye on the command line to authenticate as needed.
For MacOS, run the following command:
curl -fsSL https://clis.cloud.ibm.com/install/osx | sh
For Linux™, run the following command:
curl -fsSL https://clis.cloud.ibm.com/install/linux | sh
For Windows™ 10 Pro, run the following command in PowerShell as an administrator:
iex (New-Object Net.WebClient).DownloadString('https://clis.cloud.ibm.com/install/powershell')
Tip: To open PowerShell, right-click the Windows™ PowerShell icon, and select

If you installed the CLI plug-ins and tools, you're now ready to develop and deploy your first app. For more information, see Creating and deploying apps by using the CLI.
Stay up to date with the IBM Cloud CLI by subscribing to the IBM Cloud CLI releases repository. You'll receive notifications about new IBM Cloud CLI releases.
IBM Cloud CLI supports a plug-in framework to extend its capability. Discover and install new CLI plugins!
Tip: Need a hand with remembering IBM Cloud CLI commands? Print the IBM Cloud CLI quick reference to keep commands for common tasks at your fingertips.

Step 2: Verify the installation
To verify that the CLI was installed successfully, run the help command:
ibmcloud help
The output lists the usage instructions, the current version, and the supported commands.
Step 3: Install CLI plug-ins and tools
To manually install the CLI plug-ins and tools, see installing the tools and plug-ins manually.
Step 4: Configure your environment
1 Log in to IBM Cloud with your IBMid. If you have multiple accounts, you are prompted to select which account to use. If you do not specify a region with the -r flag, you must also select a region.
